

ACCOMMODATING PASSENGERS WITH DISABILITIES (APD) WORKSHOP

ACI Global Training

This dynamic workshop from ACI Global Training and Open Doors Organization, designed as an introductory course, is also popular as refresh training since it covers the latest regulatory changes, identifies new technologies and resources, and highlights best practices from airports worldwide. The interactive workshop concludes with an airport tour that focuses on accessible design and technology and how travelers with disabilities function and navigate within this complex environment.

Led by ODO's top trainers, the 3-day class allows ample time for discussion and Q&A. Participating for at least one day in Houston will also be staff from the FAA's Airport Disability Compliance Program.

Course Content

- Disability Awareness Module
- Federal regulations (ADA, Section 504, ACAA)
- FAA Airport Disability Compliance Program
- Roles and Responsibilities of ADA Coordinators
- Introduction to ADA Standards for Accessible Design
- Adaptive Information Technology 101
- Airport Best Practices and Innovations
- Latest Resources including ACRP Publications
- Airport accessibility tour

Houston (IAH)

November 7-9, 2017
